University Teaching Stacey Lane Tice, Nicholas Jackson, Leo M. Lambert, Peter Englot, 2005-07-08 Syracuse University was one of the first major universities to develop a summer internship program to train the hundreds of new teaching assistants appointed each year. An outgrowth of that program, this book contains essays that represent a thoughtful effort by experienced teachers--many of whom have been involved with the national Preparing Future Faculty program--to explore various ways of engaging, encouraging, and stimulating students to learn. Topics cover lecturing, leading discussions, designing laboratory and studio courses, reaching for diversity, using technology, assessing students learning, and service learning.

The University of Pennsylvania Faculty Richard H. Shryock, 2016-11-11 This book is a volume in the Penn Press Anniversary Collection. To mark its 125th anniversary in 2015, the University of Pennsylvania Press rereleased more than 1,100 titles from Penn Press's distinguished backlist from 1899-1999 that had fallen out of print. Spanning an entire century, the Anniversary Collection offers peer-reviewed scholarship in a wide range of subject areas.

What Ever Happened to the Faculty? Mary Burgan, 2009-06-03 Informed by experience, fueled by conviction, and full of practical, strategic advice for the future, *What Ever Happened to the Faculty?* is an excellent resource for administrators and faculty who are eager to change the tone and trajectory of contemporary higher education.

Faculty Stress David R. Buckholdt, Gale E. Miller, 2009 This unique book explores the wide range of factors associated with work-related stress, the sources and perceptions of stress in differing academic environments, and the importance of gender factors in understanding and dealing with work stress in academia.

Chairing an Academic Department Walter H. Gmelch, Val D. Miskin, 2004 Full of practical advice and examples, this useful guide describes the four key functions of a successful departmental chair: recruiting and developing the faculty;

managing the department's resources; leading the department; and maintaining the dual role of scholar and manager.

The Department Chair's Role in Developing New Faculty Into Teachers and Scholars Estela Mara Benisimon, Kelly Ward, Karla Sanders, 2000-05-15 With the ranks of new incoming faculty likely to swell in coming years, hiring new tenure-track instructors and seeing them through to tenure is a department chair's responsibility that carries significant departmental and institutional consequences. 'The Department Chair's Role in Developing New Faculty into Teachers and Scholars' is designed to help chairs with the three critical stages of new faculty socialization: recruitment and hiring; developing faculty in the first year; evaluating new faculty performance. The authors offer concrete advice and activities; model real-life situations; and provide examples of letters, checklists, and orientations that can be adapted to individual contexts. This book provides the tools chairs need to adapt habit and intuition into effective management practices. The authors' advice will help new faculty succeed in their goals of teaching, research, and service and their new institutions, while ensuring department chairs achieve the mission and objective of their own units and the campus and college as a whole.--

A Guide to Faculty Development Kay J. Gillespie, Douglas L. Robertson, 2010-04-12 Since the first edition of *A Guide to Faculty Development* was published in 2002, the dynamic field of educational and faculty development has undergone many changes. Prepared under the auspices of the Professional and Organizational Development Network in Higher Education (POD), this thoroughly revised, updated, and expanded edition offers a fundamental resource for faculty developers, as well as for faculty and administrators interested in promoting and sustaining faculty development within their institutions. This essential book offers an introduction to the topic, includes twenty-three chapters by leading experts in the field, and provides the most relevant information on a range of faculty development topics including establishing and sustaining a faculty development program; the key issues of assessment, diversity, and technology; and faculty development across institutional types, career stages, and organizations. This volume contains the gallant story of the emergence of a movement to sustain the vitality of college and university faculty in difficult times. This practical guide draws on the best minds shaping the field, the most productive experience, and elicits the imagination required to reenvision a dynamic future for learning societies in a global context. —R. Eugene Rice, senior scholar, Association of American Colleges and Universities Across the country, people in higher education are thinking about how to prepare our graduates for a rapidly changing world while supporting our faculty colleagues who grew up in a very different world. Faculty members, academic administrators, and policymakers alike will learn a great deal from this volume about how to put together a successful faculty development program and create a supportive environment for learning in challenging times. —Judith A. Ramaley, president, Winona State University This is

the book on faculty development in higher education. Everyone involved in faculty development—including provosts, deans, department chairs, faculty, and teaching center staff—will learn from the extensive research and the practical wisdom in the Guide. —Peter Felten, president, The POD Network (2010-2011), and director, Center for the Advancement of Teaching and Learning, Elon University

Making Sense of the College Curriculum Robert Zemsky, Gregory R Wegner, Ann J. Duffield, 2018-06-08 Readers of *Making Sense of the College Curriculum* expecting a traditional academic publication full of numeric and related data will likely be disappointed with this volume, which is based on stories rather than numbers. The contributors include over 185 faculty members from eleven colleges and universities, representing all sectors of higher education, who share personal, humorous, powerful, and poignant stories about their experiences in a life that is more a calling than a profession. Collectively, these accounts help to answer the question of why developing a coherent undergraduate curriculum is so vexing to colleges and universities. Their stories also belie the public's and policymakers' belief that faculty members care more about their scholarship and research than their students and work far less than most people.

Evaluating Faculty for Promotion and Tenure Richard I. Miller, 1987-11-15 This book provides practical recommendations for implementing an effective faculty evaluation system. It details eight characteristics of effective systems, including policies and procedures that are clearly articulated in writing, compatibility of the system with current institutional goals, and others.

Becoming a Professor Marie K. Iding, R. Murray Thomas, 2015 The book identifies kinds of higher education institutions, and types of teaching positions along with the nature of each position's responsibilities and advantages and disadvantages. It explains how graduate students can promote their future as faculty members while they are ...

A Handbook for Faculty Development William H. Bergquist, Steven R. Phillips, 1975-01-01

Comprehensive Faculty Development Michael Brisciana, 2013-04-20 ISM developed this guidebook to help schools attract, retain, develop, reward, and inspire faculty. We believe the best way to achieve these vital goals is to implement, manage, and sustain effective practices for faculty hiring, evaluation, development, compensation, and selective retention. For that reason, much of what you are about to read is process-focused. However, in working through each of the processes, it is important not to lose the forest for the trees. That is, while we strive at all points to support teachers to the fullest, this book is ultimately not about teachers—it is really about students. That is because we believe, by doing all of the things that we suggest, the school will ultimately be increasing student performance, satisfaction, and enthusiasm. Thus, it becomes a win-win situation for all involved: by supporting teachers, the school is supporting students, and doing the most that important thing it can do to ensure its long-term growth and success.
