Yes, We Are Stupid in America! Dr. Vicky Wells, 2013-01-21 Students in countries such as Finland, South Korea, and Singapore continue to outperform their peers in America. But that hasn't stopped the United States government from spending more money on education as achievement plummets. Dr. Vicky Wells, a former school principal, explores what's going on at the federal, state, and local levels so that members of the public can hold bureaucrats accountable. In a series of reality checks, she explains how to • meet the growing crisis head on; • equip students with the necessary skills upon graduation; • make decisions based upon the input of real-life educators; and • ignore politics in order to best serve students. Teachers and parents trust leaders to make decisions based on what's best for the students. Even so, all too often, decision making seems to be more about politics and quid pro quo—and this does not best serve students, educators, or the community. The educational system continues to decline, and students keep dropping out or graduating without the knowledge they need to succeed. It's time to stop constantly changing curriculum and start focusing on the real problems confronting teachers and students.

Persistent Organic Pollutants in Human Milk Rainer Malisch, Peter Fürst, Kateřina Šebková, 2023-11-12 This open access book reviews the trends of persistent organic pollutants (POPs) in human milk and discusses the main findings of five global surveys that were coordinated by the World Health Organization (WHO) and the United Nations Environment Programme (UNEP) from 2000 to 2019. Human milk was selected as core matrix for human exposure under the Global Monitoring Plan for effectiveness evaluation of the Stockholm Convention on Persistent Organic Pollutants. Milk from well-defined groups of mothers was collected and mixed to form a representative sample per country. Datasets collected represent the largest global human tissues survey with a harmonized protocol, carried out in a uniform format for more than two decades. Altogether 69 countries participated in these studies between 2000 and 2015, and more than 40 countries participated in the study from 2016 to 2019. Divided into 5 parts, the book offers an authoritative overview of human milk biomonitoring; collates the harmonized sampling requirements and analytical methods for the identification and quantification of contaminants in human milk; examines the results of the WHO/UNEP-coordinated exposure studies, including the identification of selected chlorinated pesticides, dioxin-like compounds, industrial chemicals like polychlorinated biphenyls (PCB) and chlorinated paraffins, polybrominated POPs and PFAS, among others; and traces geographic, temporal and cross-substance trends and correlations, and human health risks. The book finishes by providing the reader with the summary of the main findings and outlook from these studies, in which the comparison of concentrations found for the wide range of POPs listed in the Stockholm Convention allowed the identification of possible needs for actions and follow-ups in different countries/regions. This book contributes to the understanding of exposure to hazardous chemicals and pollution as addressed by the UN Sustainable Development Goals on Good Health and Well-being (SDG 3) and will appeal to environmental and analytical chemists, researchers, professionals, and policymakers interested in learning more about contaminants in human milk. Given its breadth, this book will also appeal to a broader audience interested in maternal and child health.

The ASEAN Regional Forum Rodolfo Severino,2009 The ASEAN Regional Forum (ARF) is the only Asia-Pacific-wide forum for consultations and dialogue on political and security issues. Although many articles and books have been published on the ARF, this is one of the few books that treat the forum comprehensively and from the standpoint of the region itself. It traces the ARF's origins, the efforts to move it from confidence building to preventive diplomacy, and the forces that hold them back, analysing the strategic environment that both constrains the ARF and makes it essential. The book discusses the question of participation, describes the numerous cooperative activities that the participants undertake, and deals with the issue of institutionalization. Finally, it assesses the ARF as a forum and a process on its own terms. The book is written by the former ASEAN Secretary-General and former senior official who was involved in the ARF's early years.

Exploring a Heritage Anne-Louise Eriksson,Goran Gunner,Niclas Blader,2012-11-08 From a historical perspective, similarities among the Lutheran churches in Denmark, Iceland, Norway, and Sweden are easily understood. But these previously homogeneous northern societies, built on a Lutheran tradition with close ties between church and state, are now considered to be among the most secular in the world, as well as being impacted by a growing presence of other religions. These changes present a major challenge to the churches concerning how to relate to the state and how to be a folk church. The goal of this volume is to explore how Lutheran identity presently shapes churches in the north. What are the burning issues engaging these churches at the beginning of the third millennium? Are there signs that they are affected by the global emergence of a theology and practice commonly known as Neo-Pentecostal or Charismatic? What is the situation for women in these churches embedded in societies ranked among the world's most egalitarian? In what ways does their Lutheran heritage influence how these churches shape themselves today? The point of departure for this study is not a predetermined,

normative understanding of what a Lutheran church is or should be, but the fact that the churches presented here represent what Lutheranism is today in this part of the world. Contributors include Anne-Louise Eriksson, Steinunn Arnthrudur Bjornsdottir, Solveig Anna Boasdottir, Niclas Blader, Carl Reinhold Brakenhielm, Thomas Ekstrand, Arnfriður Guðmundsdottir, Goran Gunner, Harald Hegstad, Hjalti Hugason, Roger Jensen, Halvard Johannessen, Peter Lodberg, Benedicte Hammer Præstholt, Karin Sarja, Ulrika Svalfors, Merete Thomassen, Marie Thomsen, Marie Vejrup Nielsen, and Else Marie Wiberg Pedersen.

Sustainability and Law Volker Mauerhofer, Daniela Rupo, Lara Tarquinio, 2020-07-07 The book discusses sustainability and law in a multifaceted way. Together, sustainability and law are an emerging challenge for research and science. This volume contributes through an interdisciplinary concept to its further exploration. The contributions explore this exciting domain with innovative ideas and replicable approaches. It combines a variety of authors, from both the public and the private sectors, and thereby guarantees a broad view that enshrines the more theoretical arguments from the academic side as well as stronger practical applicable perspectives. The book provides space for thoughtful expansions of established theories as well as the hopeful emergence of innovative ideas. Moreover, the combination of three to five contributions into the eleven parts respectively aims toward a compression of like minded thoughts. This should lead to an intensification of exchange of viewpoints from different angles on a similar theme. Readers therefore also have the opportunity to concentrate on single chapters, but receive comprised knowledge and a variety of thoughts for new ideas on a particular theme.

Professional ASP.NET 2.0 Design Jacob J. Sanford, 2007-08-27 This book is for anyone who wants to learn about using .NET for web interface design. Beginner or hobbyist .NET developers can certainly get a good foundation of .NET web interface design by going through this book from cover to cover. However, more seasoned .NET professionals, especially if they tend to steer away from the GUI of their projects, can also pick up a thing or two by focusing on certain chapters that appeal to them. This book is meant to take a reader from the beginning of a project to the completion of the interface design. Along the way, concepts are illustrated to show how the different pieces play together. So, anyone who really wants to understand the concepts presented in this book will be able to do so by reading the entire thing. However, this book should also serve as a good reference after you have read it or, in some cases, in place of reading it. All of the early chapters provide

useful information and examples for any web developer. Many of the concepts presented after Chapter 4 are more specifically targeted at .NET developers. In the later chapters, the target audience is .NET developers or, at least, people who want to become .NET developers. In those chapters, you should probably have at least a basic understanding of the .NET Framework and some experience with Visual Studio 2005 (or possibly Visual Studio 2003). If you are completely new to .NET, you may find it useful to pick up a beginning ASP.NET 2.0 book before delving too deeply into those chapters. If you want to learn about .NET 2.0 web interface design, you are the intended audience. It should be noted that all of the .NET code samples in this book are in C#. However, this shouldn't limit other developers, such as VB.NET developers, from understanding the concepts or being able to replicate the code in their own projects. The actual managed code examples are pretty limited and, when they are used, they should be fairly easy to port over to VB.NET. This book covers the concepts serious developers need to begin designing cool and consistent web layouts. The early chapters focus on general web design standards that you need to grasp in order to move into the later chapters. Specifically, these concepts are: Basic web design considerations (colors, fonts, images, accessibility, and so on) (Chapter 2) Photoshop basics to get you started making your own graphics and color schemes (Chapter 3) Cascading Style Sheets (CSS) and their use in web design layout (Chapter 4) When you finish these chapters, you will have the basic shell for the project that you will continue to develop throughout the book. You will have the header graphic, color scheme, and CSS layout that you will begin to incorporate .NET-specific concepts to in the later chapters. This includes: How to make .NET controls render accessible CSS code rather than their default: tables (Chapter 5) Using the built-in controls of .NET to create easily maintainable and consistent site navigation (and how to make them render CSS divs instead of tables) (Chapter 6) Creating your web site template with Master Pages (Chapter 7) Creating themes and skins to style your .NET controls (Chapter 8) Applying themes to your projects through various approaches, including base classing (Chapter 9) The final "regular" chapter ends with you building an entirely new mobile device theme using all of the concepts learned in the previous chapters. In Chapter 10, you will start with modifying your graphic to better fit the resolution of your mobile devices. You will also learn how to modify your stylesheets and apply them programmatically to be used only for this theme. You
